Leon Nsamba		l.nsamba@alustudent.com
Michael Odhiambo		m.odhiambo@alustudent.com

Task Allocation and Tracker

	Task Allocated	Assigned Member	Deadline	Completion Status (Not Started/In Progress/Completed/Did not participate)	Reviewed by Team? (Yes/No)	Comments
	Gradient Descent Manual Calculation	Leon Nsamba	25/10/2026	Completed	Yes	
	Bayesian Probability	Michael Odhiambo	25/10/2026	Completed	Yes	
	Probability Distributions	Daniel Gakumba Ntwali	25/10/2026	Completed	Yes	
	Gradient Descent Manual Calculation Iteration 1	Daniel Gakumba Ntwali	25/10/2026	Completed	Yes	
	Gradient Descent Manual Calculation Iteration 2	Michael Odhiambo	25/10/2026	Completed	Yes	
	Gradient Descent in Code	Leon Nsamba	25/10/2026	Completed	Yes	

Meeting Attendance Log

Meeting Date	Agenda	Facilitator	Attendees	Key Discussion Points	Next Steps
17/10/2026	Inital discussion of assignment rubric and decision on task allocation	Marvin Ogore	Leon Nsamba, Michael Odhiambo, Daniel Gakumba Ntwali	We went through the assignment rubric, decided that the best way forward was equally dividing the three tasks amongst ourselves whilist keeping each other in the loop with the explanations for our respective tasks.	Completion of repo setup, task allocation, creation of notebook

22/10/2026	Meeting during the class session to share our progress in regards to our respective sections, and gain a better understanding of the differernt sections	Marvin Ogore	Leon Nsamba, Michael Odhiambo, Daniel Gakumba Ntwali	We shared our progress with our different sections that we had choosen, had brief explanations of the rationale we considered and the logic in regards to where we were at with our different sections, as we continue preparing for the deadline. Leon also shared the first part of the manual calculation in the gradient descent section which the other members were to complete one extra iteration each	Polish up on code for different sections of the notebook, complete the manual calculation iteration for gradient descent	
26/10/2026	Final meeting, discussing key points like the bias decision, organizing our repository structure, c	Marvin Ogore	Leon Nsamba, Michael Odhiambo, Daniel Gakumba Ntwali	We finally diverted back to using a shared bias after reviewing literature from a paper from the university of toronto which debunked the idea we had of using different biases. We organized our code within the repo, created a merged notebook containing all the three parts, filled in our respective sections of the readme, and discussed the best way forward in regards to presentation preparation	Final submission of deliverable and presentation
